

## **PAYMENT STATUS MAINTENANCE HISTORY (47D SCREEN)**

On March 29, 1996, DAFR3801 incorrectly flagged warrants with L22 and L17 errors. Therefore, warrants were marked as paid, but no redemption transactions were generated. On April 1, 1996, Project MAIN corrected the situation by generating redemption transactions. However, the warrants were marked as paid again on the payment history table. If the warrant in question is marked twice as paid (once on 03/29/96 and second time on 04/01/96), then it has not been paid twice and is a direct result of the problem experienced on 03/29/96.
